

# Tree Survey.

## Specification Sheet

We provide BS5837-2012 Compliant Tree Surveys. Our digital pack (in the form of a PDF) will consist of:

- ✓ 2012 Compliant Tree Survey - for Planning applications;
- ✓ The positioning of the trees on an ordnance survey map;
- ✓ The common and Latin name of each tree;
- ✓ The approximate age of each tree;
- ✓ The diameter of the trunk of each tree;
- ✓ The approximate height and spread of the canopy of each tree;
- ✓ A brief description of each tree and its health;
- ✓ The Estimated Remaining Contribution category (ERC).

### How does it work?

Following your initial contact with ProHort, we will be able to provide you with any advice you may require regarding the requirements for the tree survey and arrange for our specialist consultant to carry out the survey. You will need to provide us with an idea of how many trees are located on the site, in order for us to be able to provide you with an idea of costing.

The specialist consultant will then visit the site to carry out the survey and take any required measurements. If required, the consultant will meet with yourself or the client onsite to ensure that any specific requirements for the survey are incorporated into the resulting report.

The tree survey report will then be put together and sent in the form of a digital PDF within 48 hours of the site visit taking place. The report can be provided under ProHort branding or, alternatively, it can be provided as a white label document to be incorporated into your own documentation.

### Pricing

Pricing for tree surveys are based upon the number of trees on site, starting at £200+VAT. Please get in touch for an exact quote.
